

PRRC produce wide range of zinc dust to meet the demands of various industries. The product is finely divided metallic dust of zinc having high purity with very fine uniform properties. PRRC zinc dusts are preferred in paint & pigment industry. The uniform particle size and spherical shape of the product provides the zinc rich paint formulations superior brushing qualities and improved suspension characteristics. Major application of PRRC zinc dust is as follows:

- Manufacture of zinc rich paint formulation
- Mechanical plating of small steel parts
- Additive for lubricants
